### **DETAILED ACTION**

## Claim Objections

1a. Claims 58 and 59 are objected to because of the following informalities: Claims 58 and 59 should be dependent on claim 50. Appropriate correction is required.

#### Election/Restrictions

1. Newly submitted claims 33-49 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claims 33-49 are directed to a method claims.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 33-49 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

#### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 50-52, 54-57, 60-62 and 64-66 are rejected under 35 U.S.C. 102(b) as being anticipated by Kato et al (US 5,685,357).

Application/Control Number: 10/663,437 Page 3

Art Unit: 1725

As to claims 50-52, 60-62 and 66, Kato et al disclose a flow system comprising a runner, a controlled expansion region(45) with an effective cross-sectional area of the runner for determining the flow velocity and a form of expansion region which enables alloy flow therein to spread laterally, whereby the form of the flow system enables the flow velocity in the runner and the reduction in flow velocity in the expansion region by which the state of the alloy is changed from a molten state in the runner to a semi-solid state for flow through the gate and into the die cavity (figure 1).

As to claim 54-57 and 64-65, Kato et al disclose the controlled expansion region is provided by a step-wise increase in cross section. The system is capable to have a flow velocity between 140 to 165 m/s.

# Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 1725

E.

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 53, 58, 59, 63, and 67 rejected under 35 U.S.C. 103(a) as being unpatentable over Kato et al (US '357).

Kato et al disclose the claimed invention above, but fail to teach a ratio in the areas being 2:1 to 4:1 and the velocity in the expansion region is about 25% to 50% less than the velocity of the flow through the runner.

However, such modification would have been obvious to one of ordinary skill in the art, since Kato et al had taught an expansion region, and wherein modifying the expansion region would depends on the metal being cast.

#### Response to Arguments

- 7. Applicant's arguments with respect to above rejected claims have been considered but are most in view of the new ground(s) of rejection.
- 8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 10/663,437

Page 5

Art Unit: 1725

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Len Tran whose telephone number is (571) 272-1184. The examiner can normally be reached on M-F, 8:30 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
